ONE APPROACH, TWO DESTINATIONS

The °Fahrenheit 7 concept was born out of a friendship between the Vidoni and de Unger families. Two couples, with children in the same class room, shared a vision for a different kind of hospitality in the mountains. Their ambition: to give a new dynamism to ski hotels, combining cosy and lively spaces, but always focusing on the main reason to stay - to ski. The result: °F7 Val Thorens opened its doors in November 2016, and °F7 Courchevel in December 2017. Both hotels provide a relaxed 4* atmosphere, Courchevel more homely, Val Thorens a touch more lively but both with a modern and comfortable feel with a vintage twist. The ski-in, ski-out location makes them ideal for both family holidays or holidays with friends.

A BREATH-TAKING LOCATION

Right on the foot of the slopes of Courchevel 1650, °F7 Courchevel is ideally located. Just a few steps to the right of the ski room is the new Ariondaz bubble that will enable you to quickly reach not only the local slopes but also to connect to Courchevel 1850 and on to the rest of the 3 Valley ski area. On the left is the meeting place for the ESF ski school, for children and beginners as well as the terrace of the Rotisserie, if you want a quick coffee before you hit the slopes. Whatever your level, skiing couldn't be more convenient.
